

COLORSORB TECHNICAL DATASHEET

ColorSorb® P5

powdered wood based activated carbon

ColorSorb® P5 is a premium activity adsorbent manufactured using chemical activation (phosphoric acid) of select grades of wood. This material has a predominantly macroporous structure for efficient diffusion and effective adsorption of high molecular weight organic substances in liquid phase decolorization applications. The chemical activation process produces an adsorbent with a surface pH designed to maximize decolorization performance. Strict control of the particle size is used to optimize adsorption kinetics and assist with efficient filtration.

ColorSorb* is designed for use in food, chemical and pharmaceutical applications, for the adsorption of large organic molecules and decolorization.

Specification*

lodine number	min. 900 mg/g
Molasses number	120-160
Total ash content	max. 6%
Moisture content	max. 10%
pH	4.5 - 6
Phosphate content	max. 1.7%

Particle Size Distribution

<100 U	SS (0.15 mm)	95 - 100%
<200 U	SS (0.075 mm)	85 - 95%
<325 U	SS (0.045 mm)	65 - 85%

Typical Properties*

Surface area (BET) 1150 m²/g

Features and Benefits

- Chemical activation (phosphoric acid)
- Premium activity adsorbent
- Predominantly macroporous
- Low mineral ash content
- Stringent pH specification
- Strictly controlled particle size

Typical Applications

- Starch based sweeteners
- Dextrose
- Glucose
- Fructose (HFCS)
- Pharmaceuticals (API)
- Yeast extracts

Certifications and Approvals

• US Food Chemicals Codex

Standard Packaging

- 20 kg (44 lb) sacks
- 400 kg (880 lb) bulk bags

The multiwall paper/PE bag from Jacobi sets the standard in the industry for clean, durable and safe handling.

^{*}Specifications and typical properties are produced using Jacobi Carbons' test methods. They are listed for informational purposes only and not to be used as purchase specifications. Sales specifications can be obtained from your Jacobi Carbons Technical Sales Representative and should be reviewed before placing an order.

Paper bags, 20 bags per pallet.

confined spaces where wet activated carbon is present. Ensure the use of correct breathing apparatus. Material Safety Data Sheets should be consulted for further details on procedures in the event of contact with activated carbon.
